Walk-forward performance diagnostics

1,722 / 1,760 complete dates. Monthly returns require every session; missing months stay unavailable.

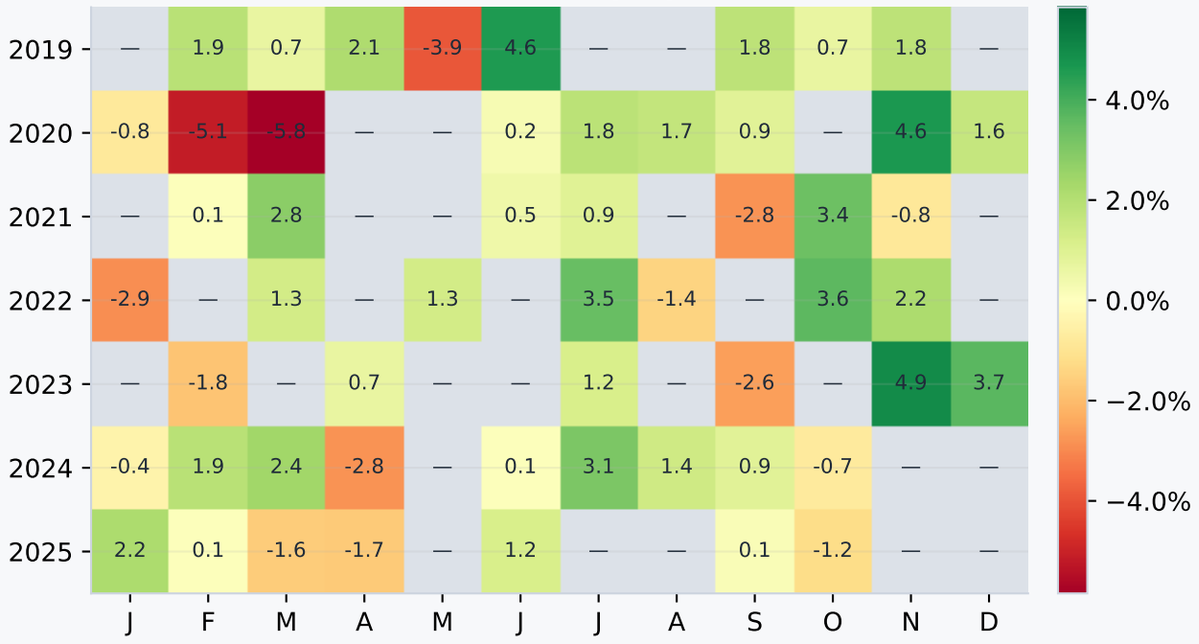

Annual Sharpe · complete dates

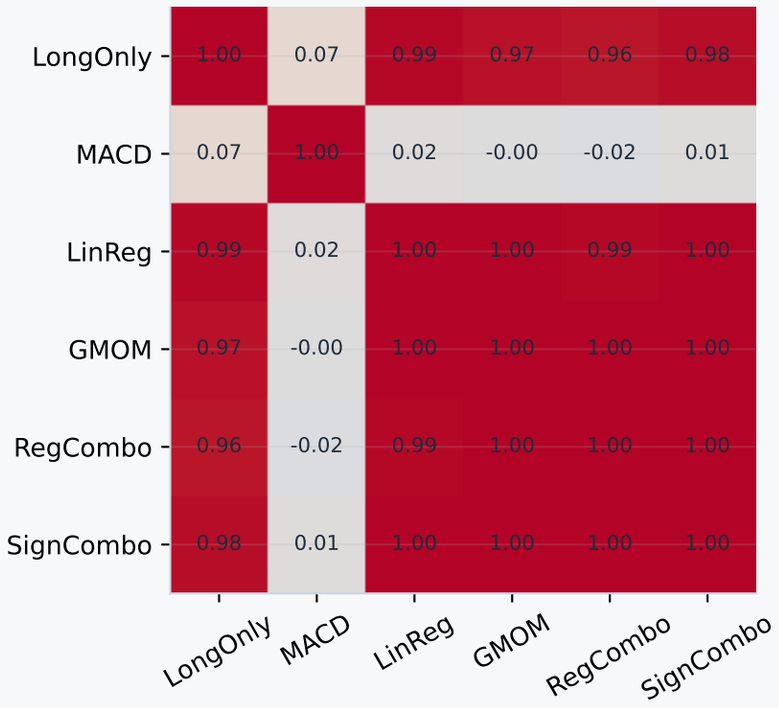

Daily return distribution

GMOM monthly return · grey = unavailable

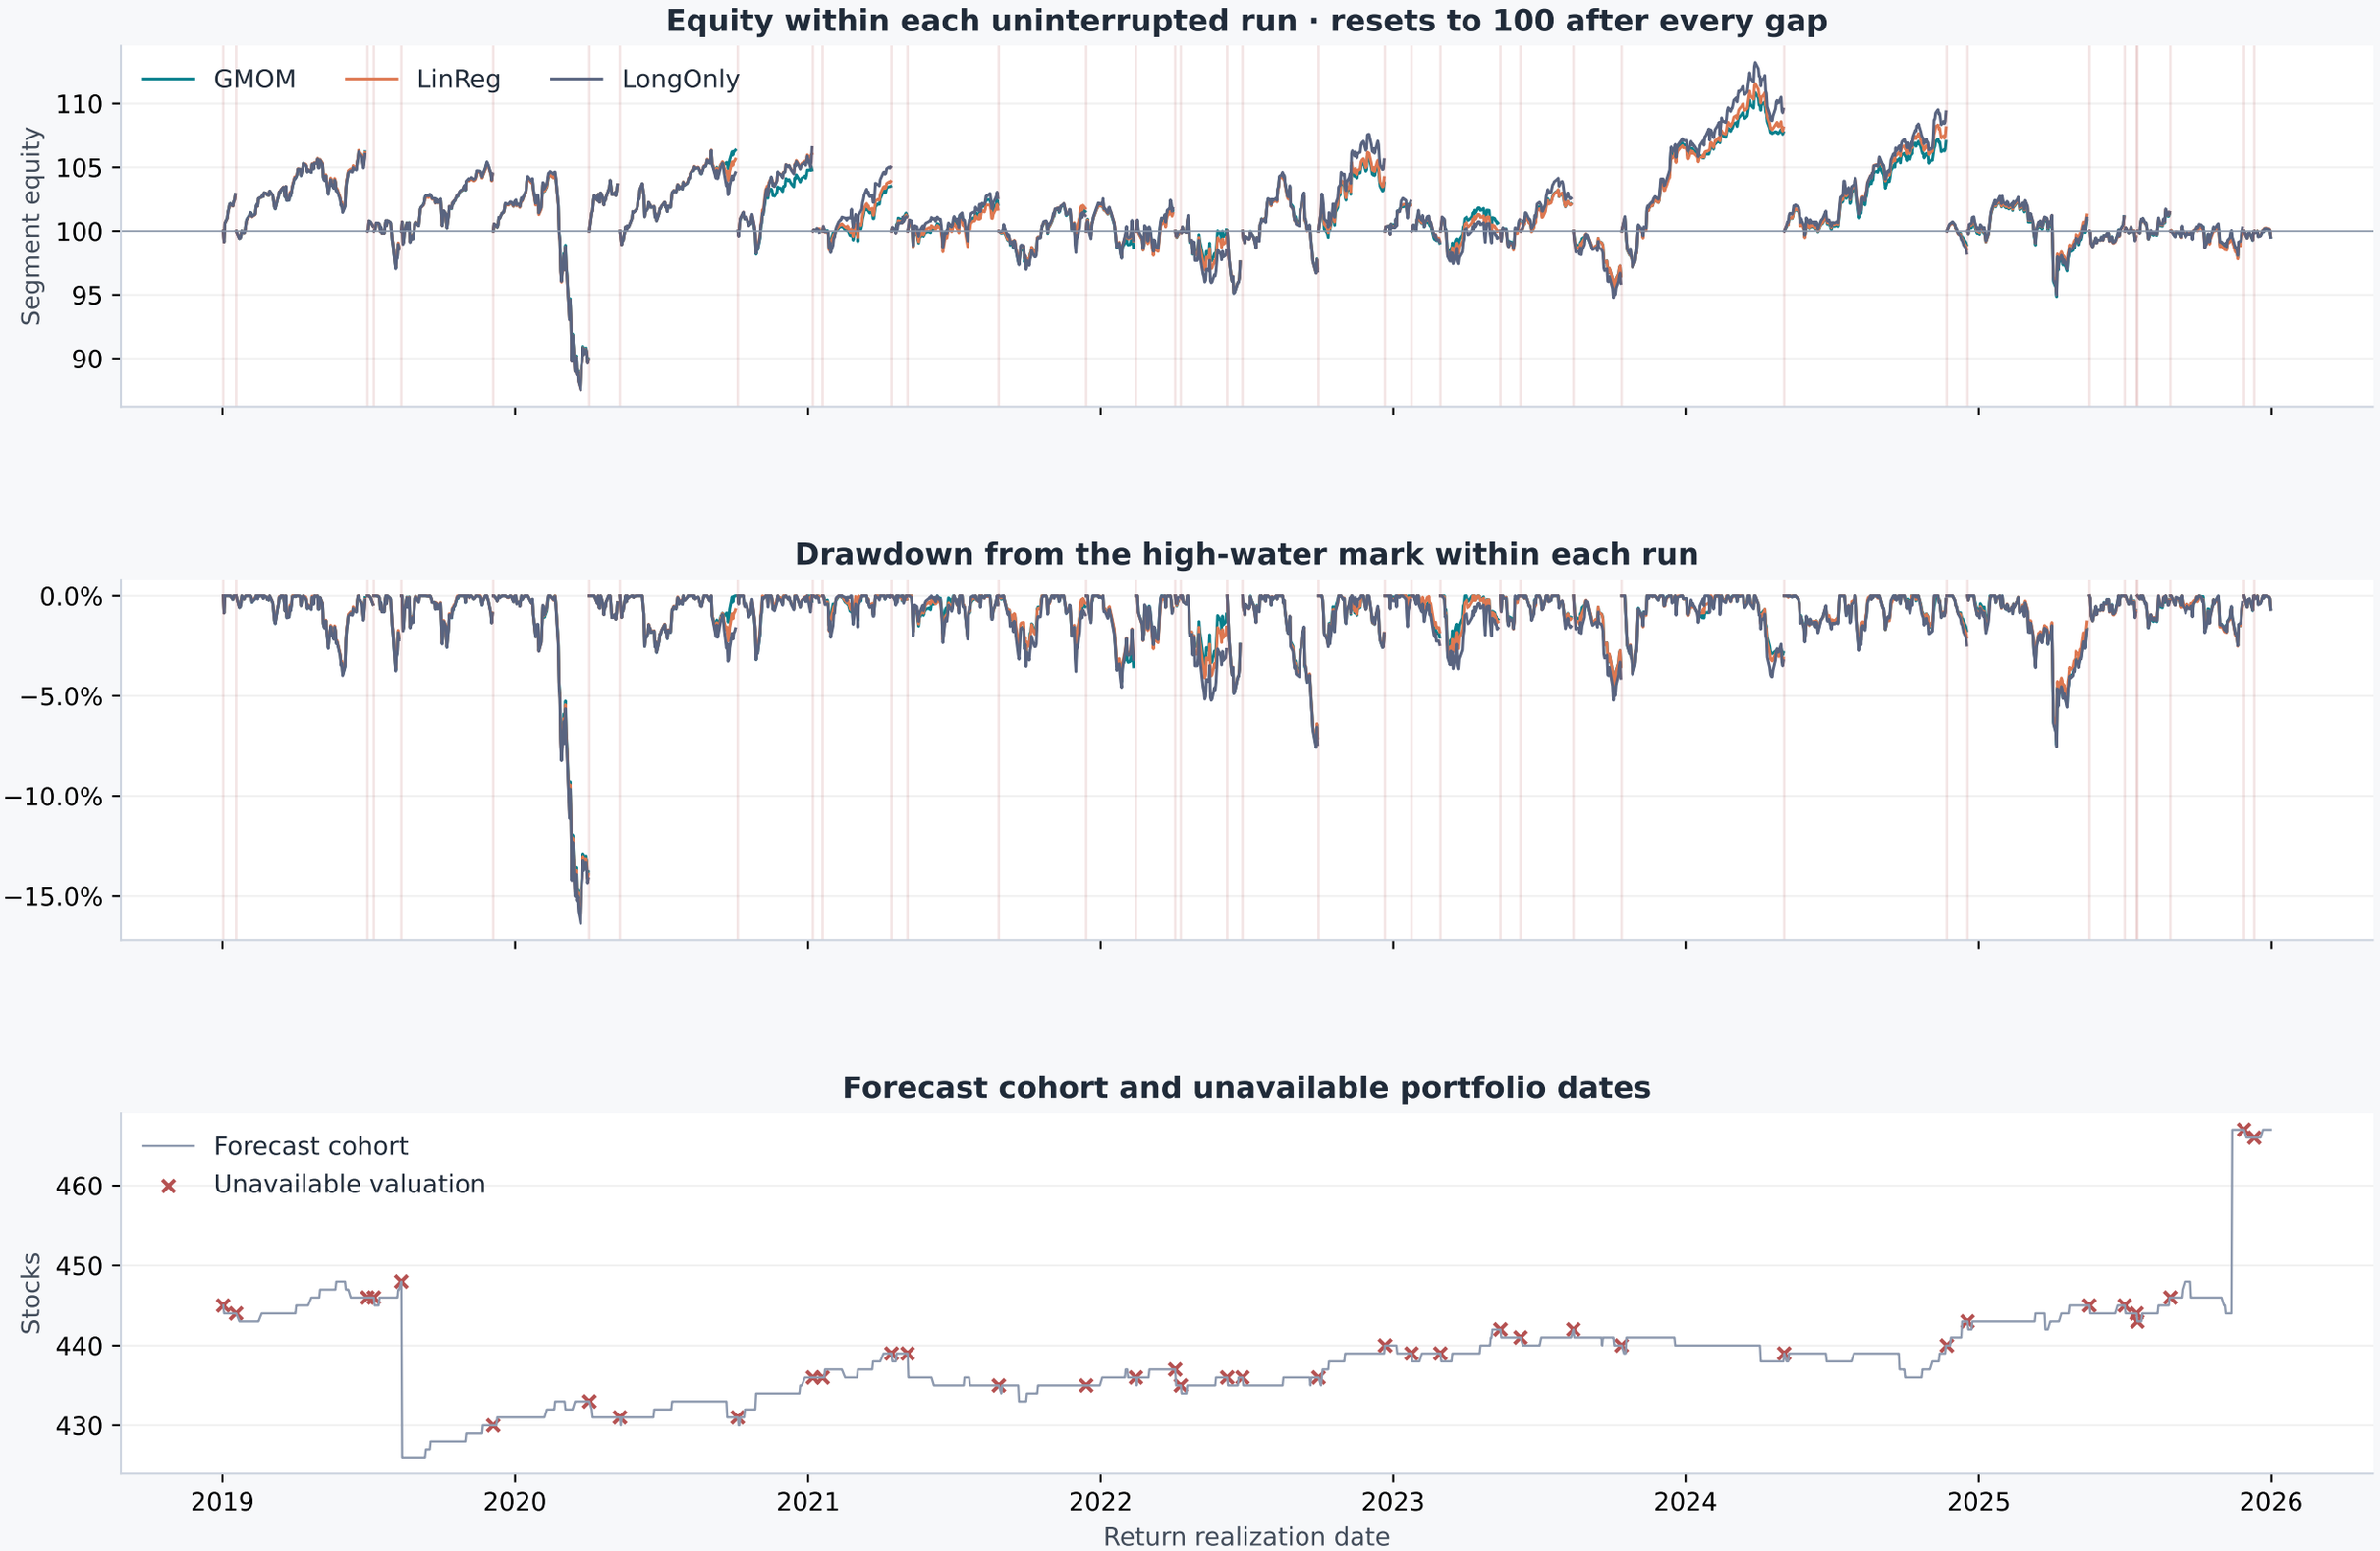

Daily return correlations · complete dates

2019–2025 annual expanding WFO • zero-cost close-to-close research proxy • no executable-fill or terminal-cash accounting

Equity and drawdown with gaps preserved

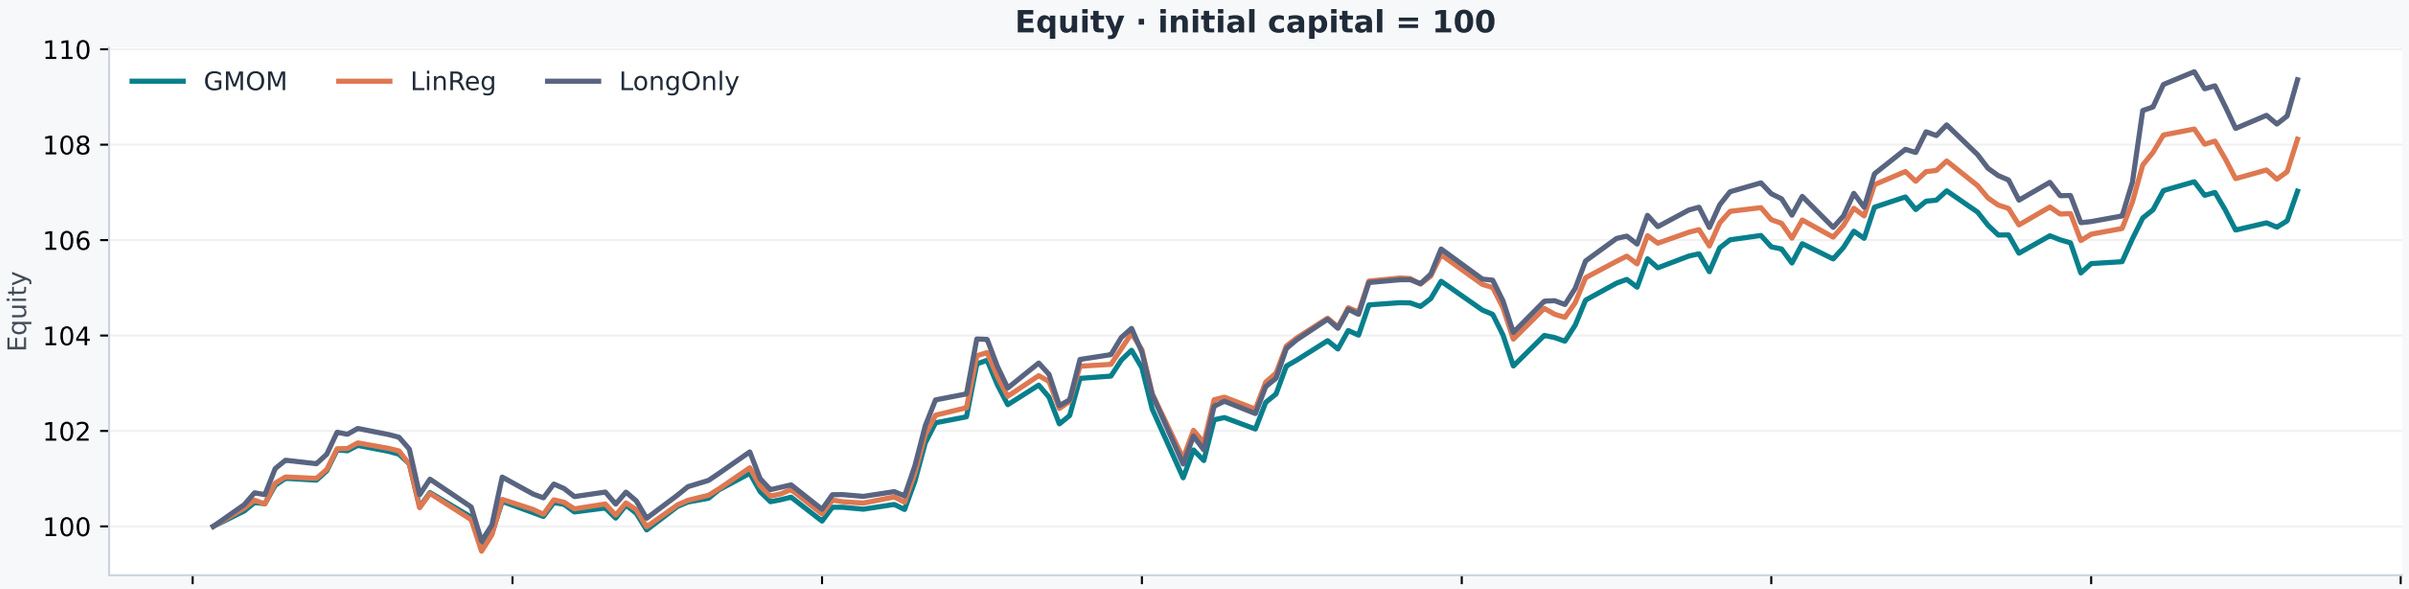

37 independent complete runs. Lines stop at gaps; a new run has a new 100 baseline. These are not continuous seven-year wealth paths.

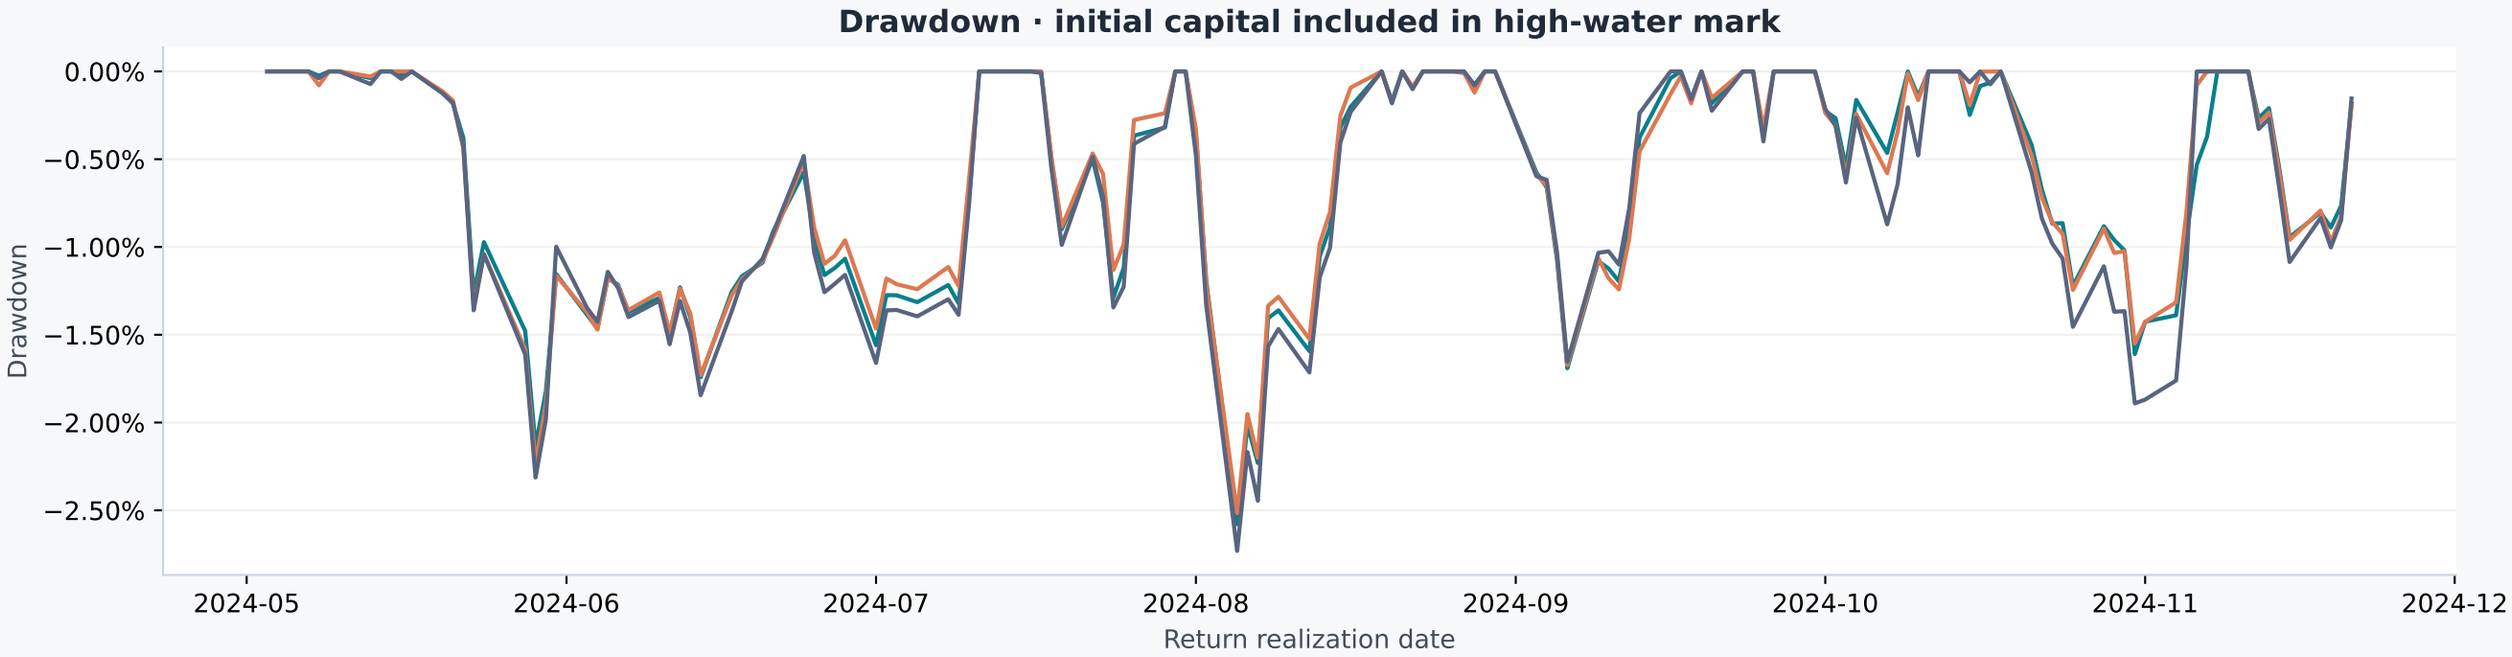

2019–2025 annual expanding WFO • zero-cost close-to-close research proxy • no executable-fill or terminal-cash accounting

Equity and drawdown · longest complete interval

2024-05-06 to 2024-11-21 · 140 sessions · selected only by data continuity, not performance. Short-period results are not full-WFO results.

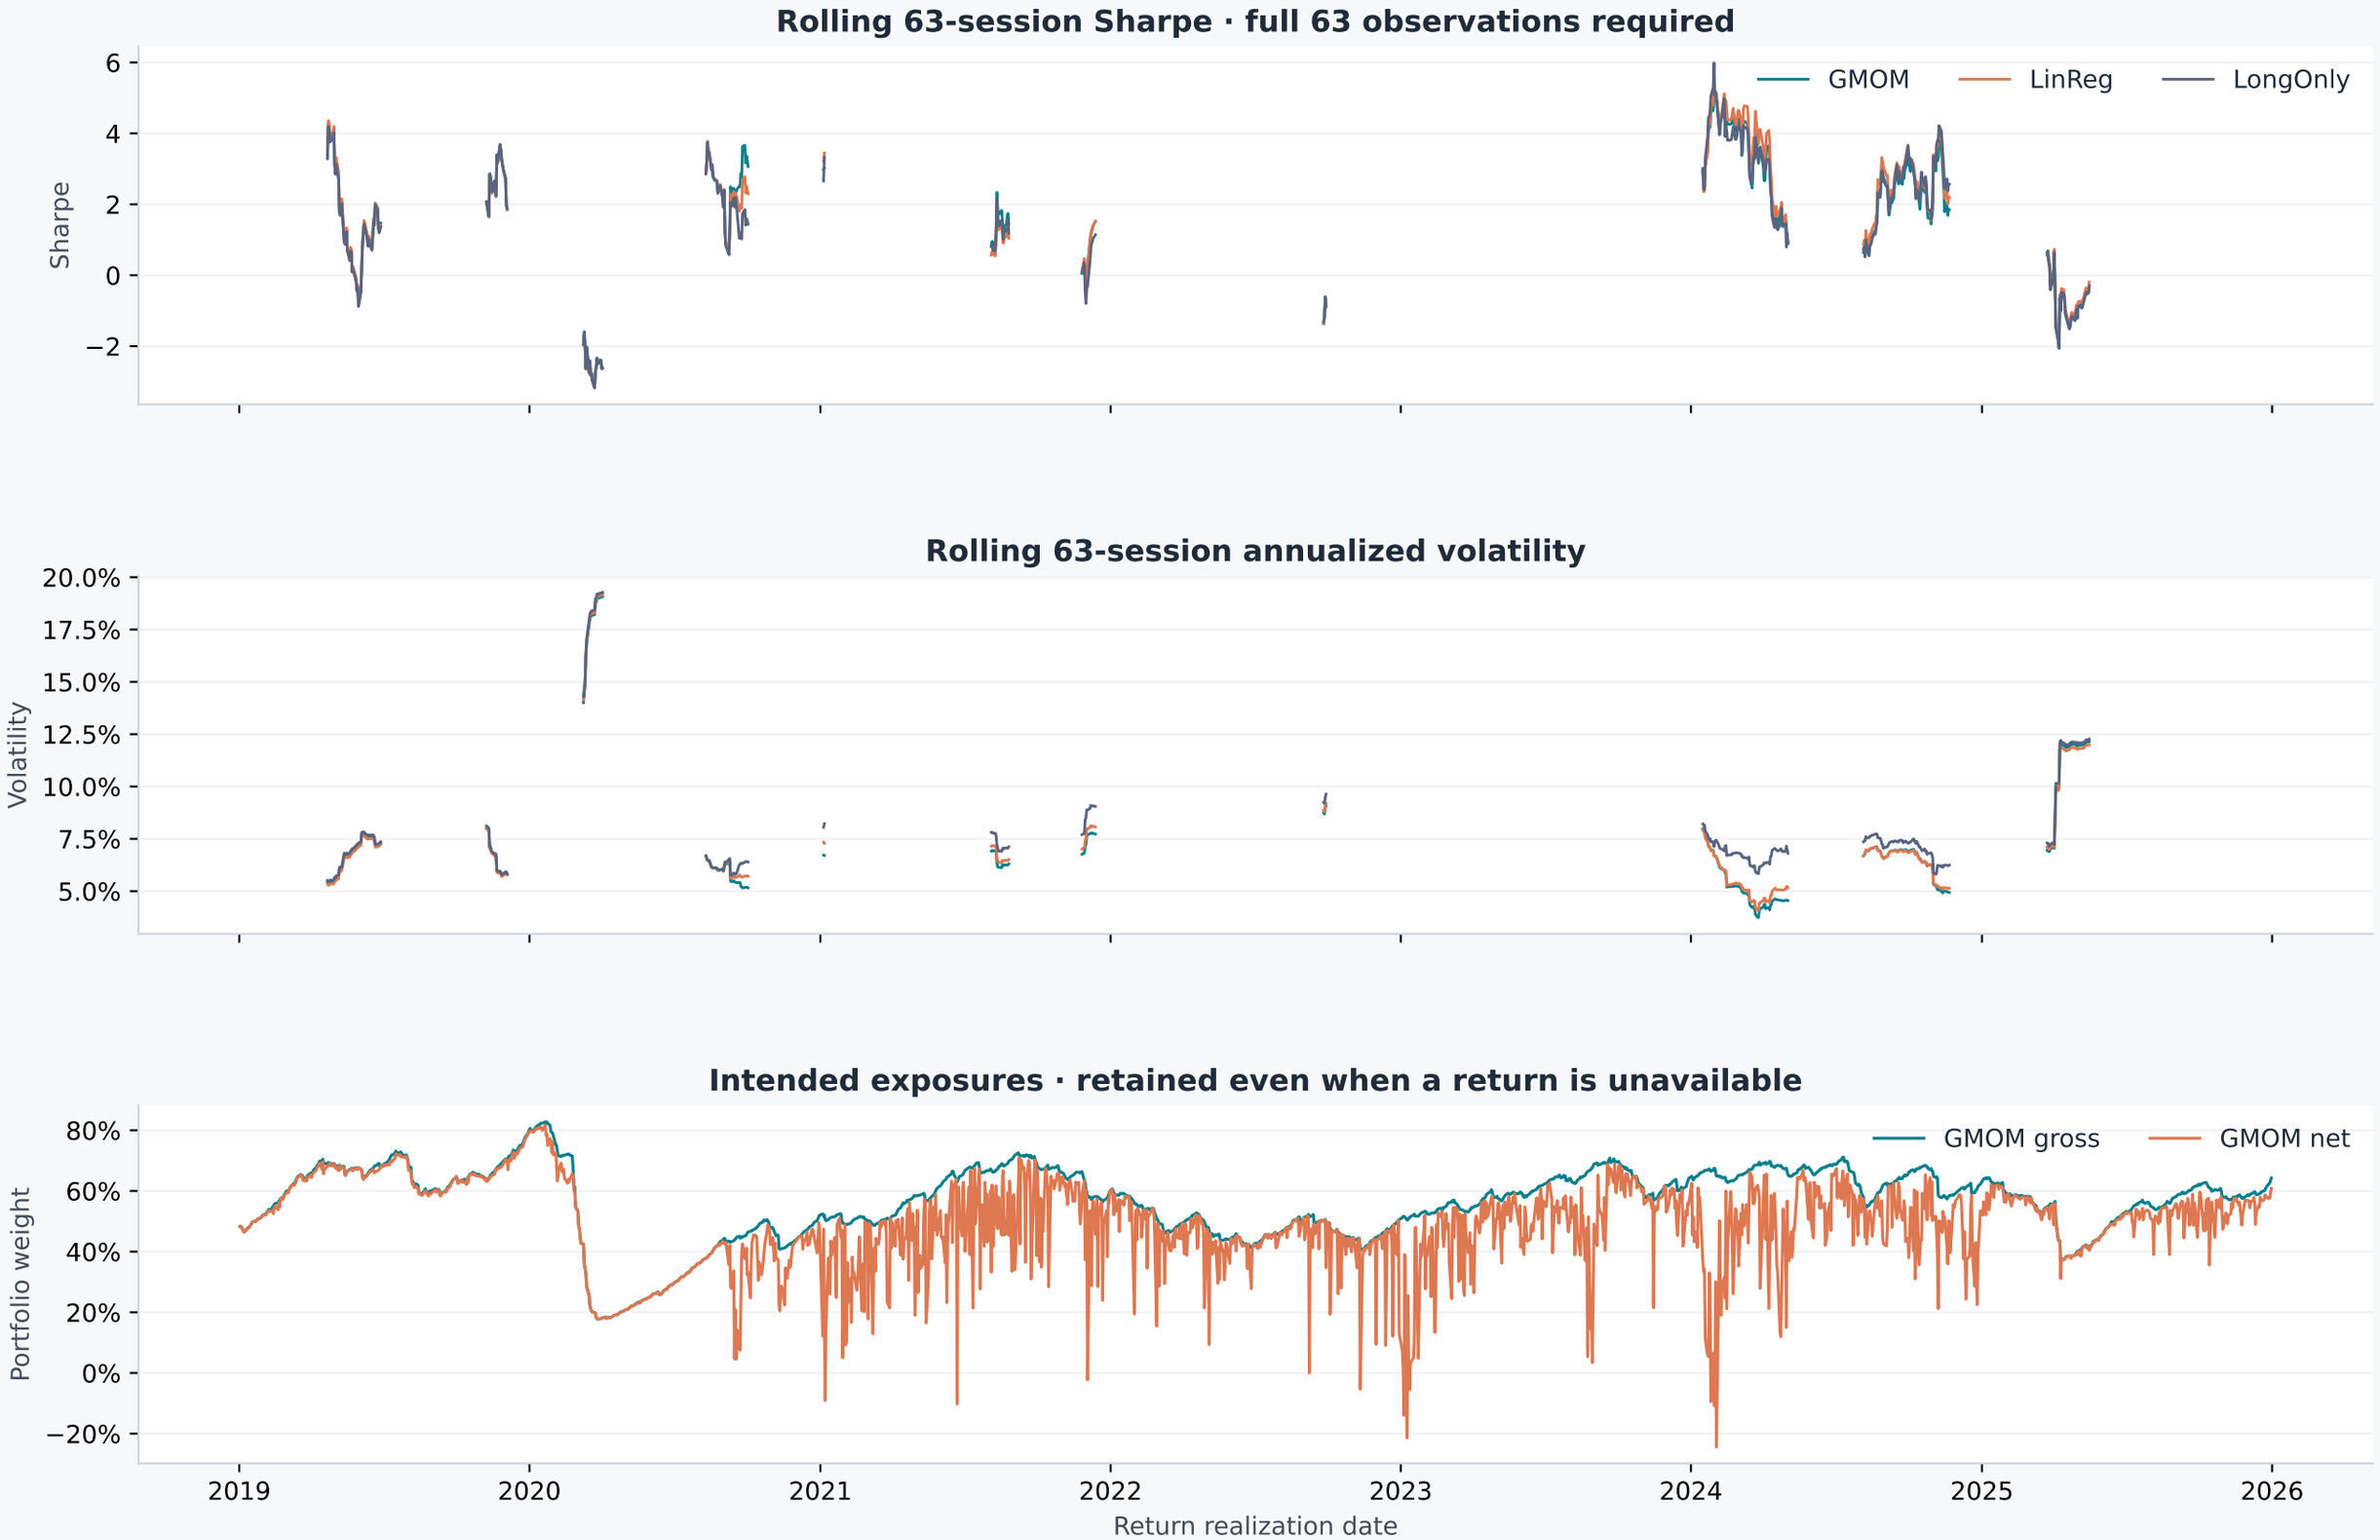

2019–2025 annual expanding WFO • zero-cost close-to-close research proxy • no executable-fill or terminal-cash accounting

Rolling risk and portfolio exposures

Rolling statistics do not skip missing dates. Ratios use a zero risk-free / target-return threshold; exposures are signal-date intended weights.

2019–2025 annual expanding WFO • zero-cost close-to-close research proxy • no executable-fill or terminal-cash accounting
