Walk-forward performance diagnostics

1,758 / 1,760 complete dates. Monthly returns require every session; missing months stay unavailable.

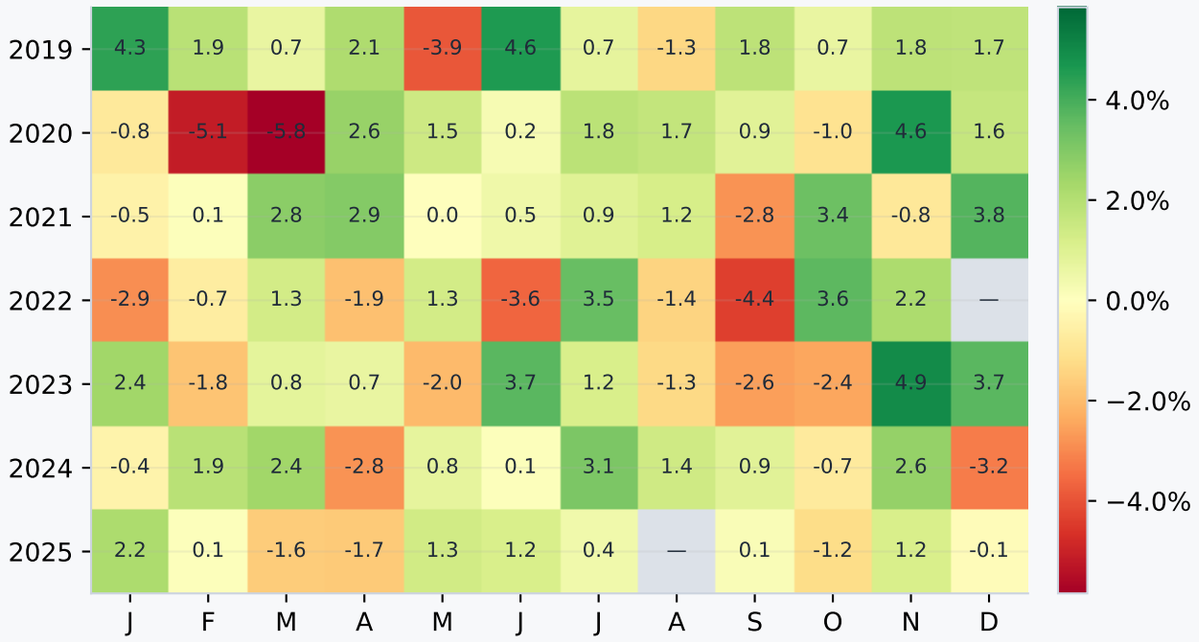

Annual Sharpe · complete dates

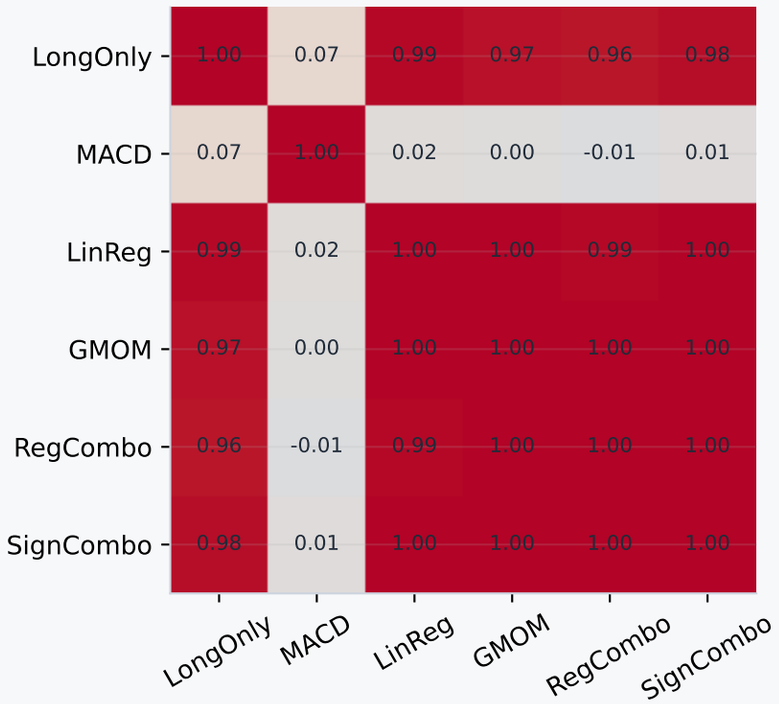

Daily return distribution

GMOM monthly return · grey = unavailable

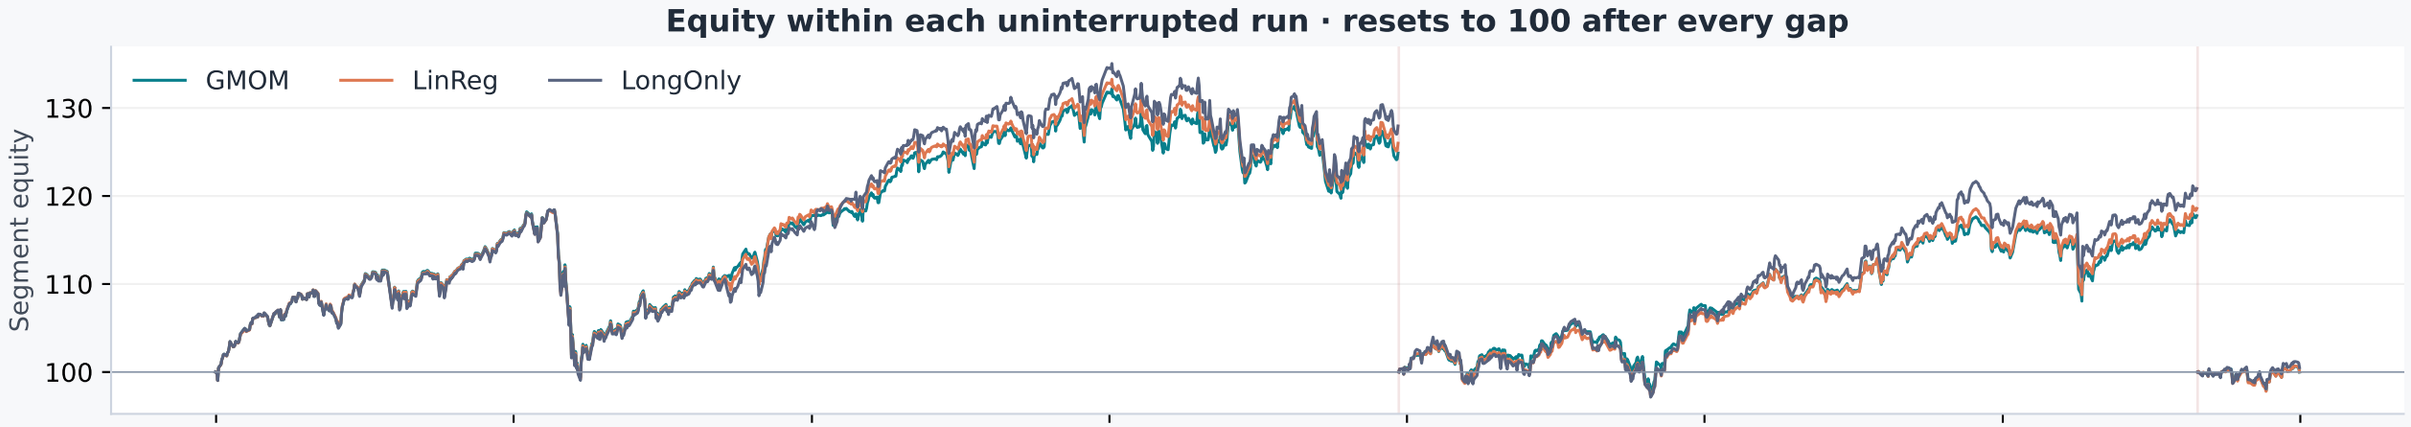

Daily return correlations · complete dates

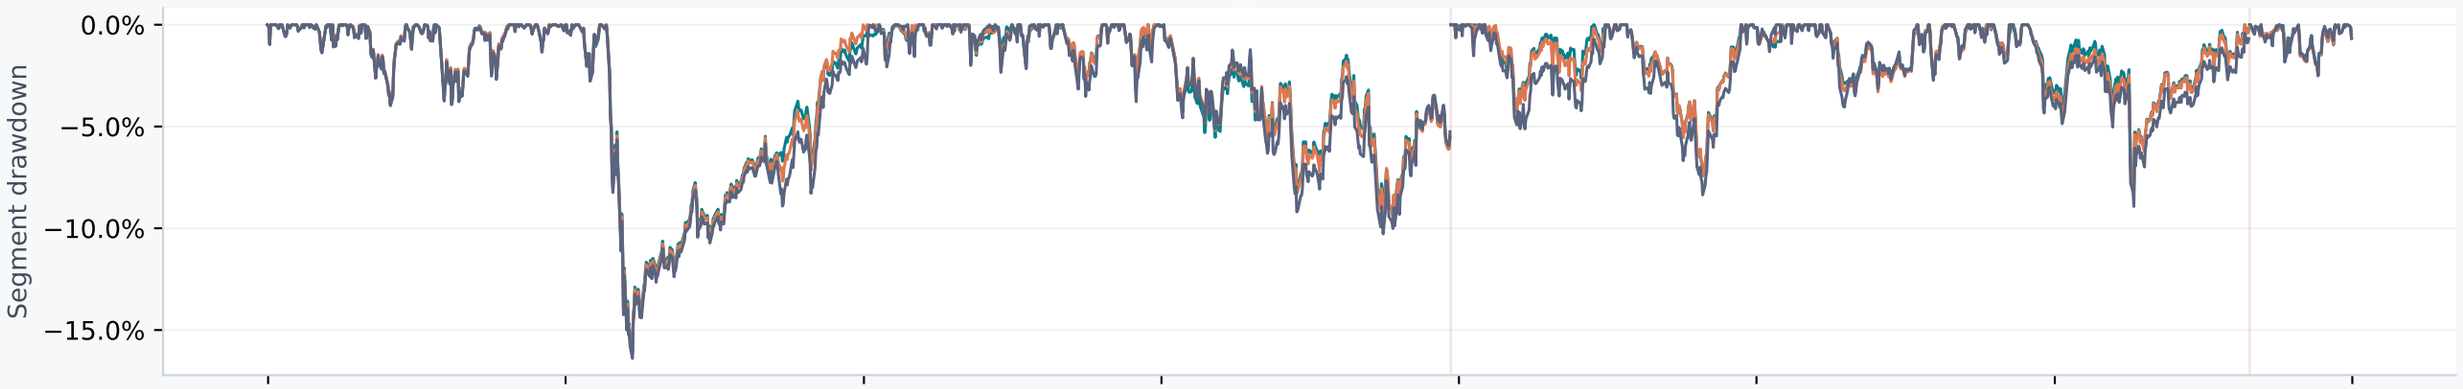

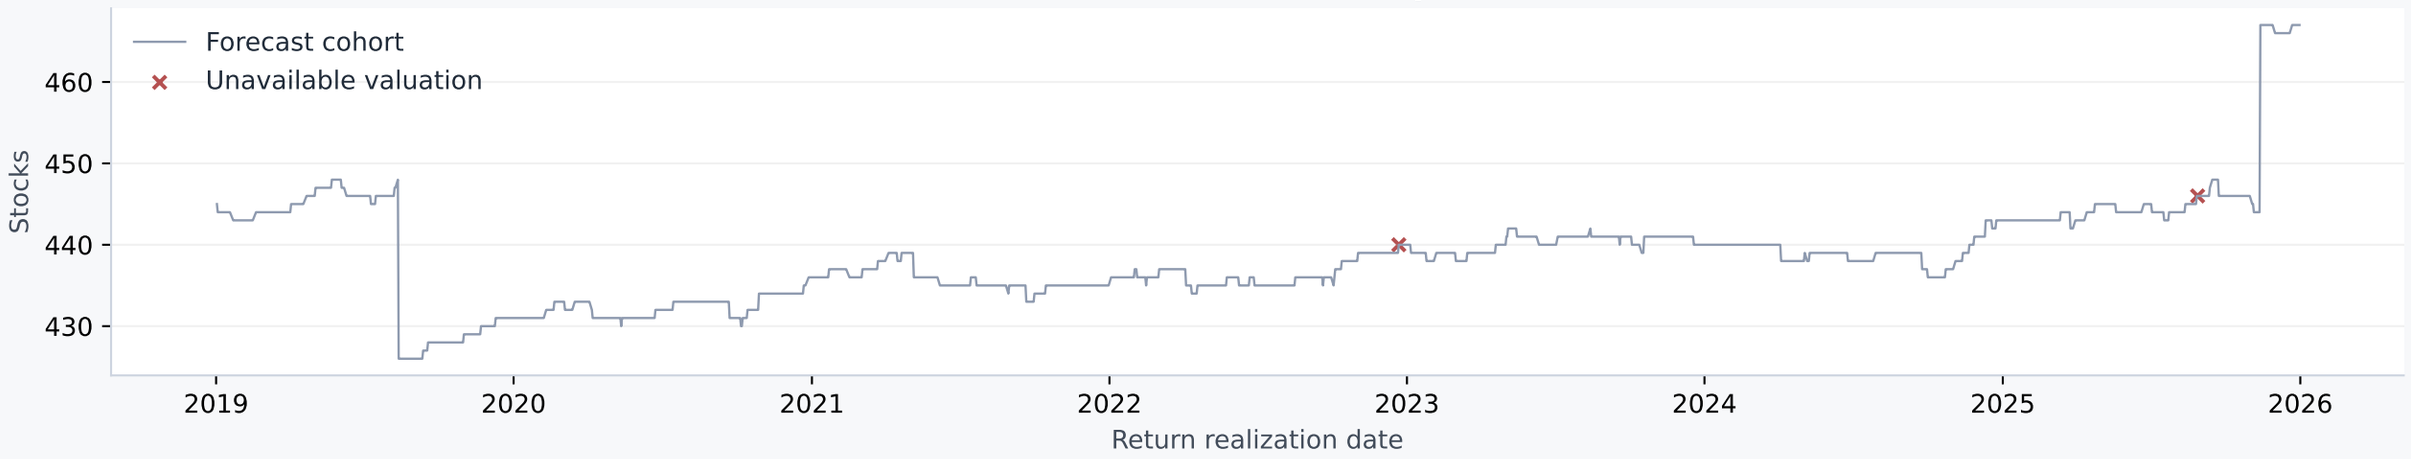

2019–2025 frozen WFO • repaired held valuations • contingent rights unresolved • zero-cost research proxy; executable fills excluded

Equity and drawdown with gaps preserved

3 independent complete runs. Lines stop at gaps; a new run has a new 100 baseline. These are not continuous seven-year wealth paths.

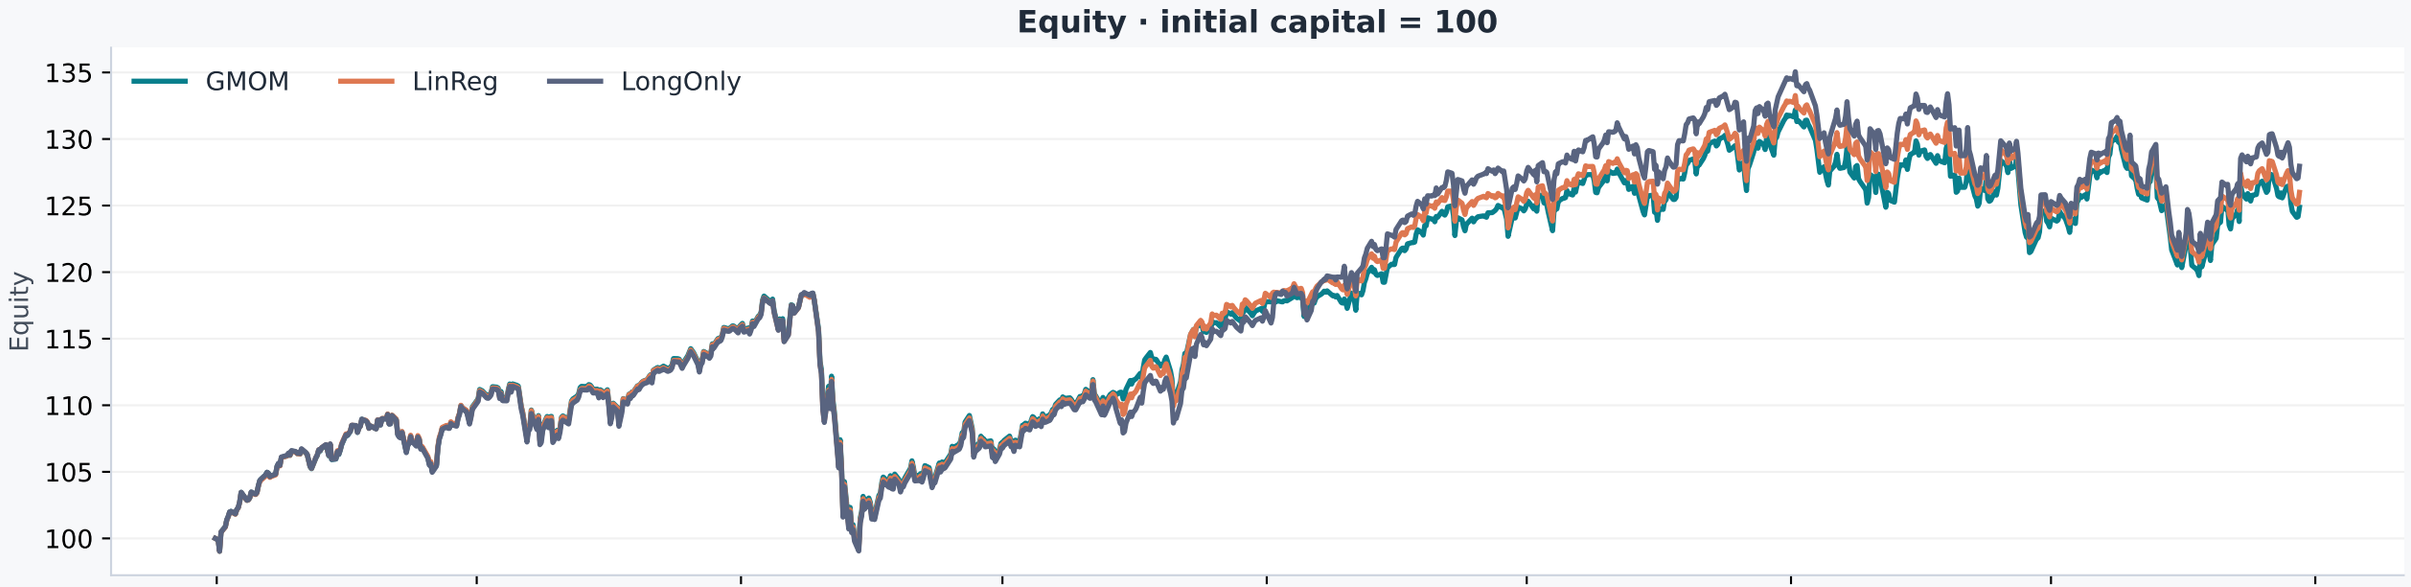

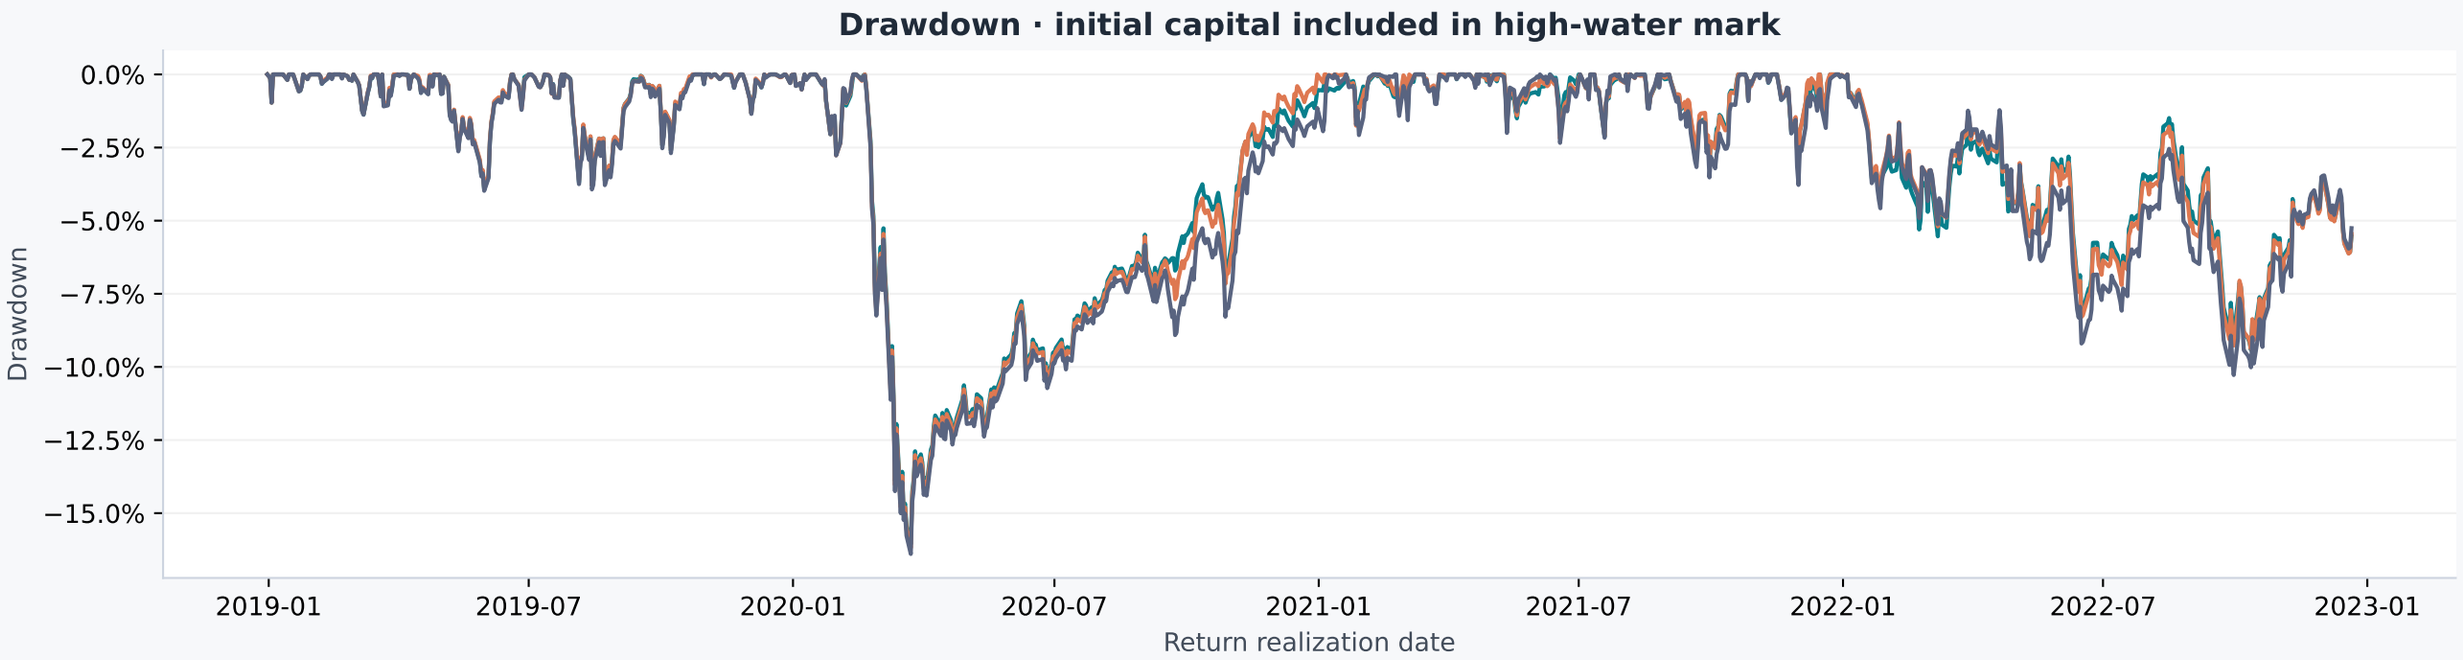

2019–2025 frozen WFO • repaired held valuations • contingent rights unresolved • zero-cost research proxy; executable fills excluded

Equity and drawdown · longest complete interval

2019-01-02 to 2022-12-21 · 1002 sessions · selected only by data continuity, not performance. Short-period results are not full-WFO results.

2019–2025 frozen WFO • repaired held valuations • contingent rights unresolved • zero-cost research proxy; executable fills excluded

Rolling risk and portfolio exposures

Rolling statistics do not skip missing dates. Ratios use a zero risk-free / target-return threshold; exposures are signal-date intended weights.

2019–2025 frozen WFO • repaired held valuations • contingent rights unresolved • zero-cost research proxy; executable fills excluded
